

## **Firmware Update Method**

*NOTE*: There are 2 parts to this firmware update. You will need a formatted USB Thumb Drive to complete the update.

## Part 1 - CPU Firmware Update

1. Download the firmware update onto your desktop of your PC or laptop.

2. Unzip the downloaded file and you will see the below folder on your desktop.

3. Open the unzipped folder. Format your USB thumb drive and copy the below file to it.
